HTML	CSS	TailwindCSS	JavaScript	React	TypeScript	NextJS	Figma	API Integration
SEO	Git	GitHub	Redux	Chart.js	Responsive Web	Vercel	UI/UX Principles	

EXPERIENCE

Hackathon Winner | Vitalink Project

Cavista Technologies

02/2025

- Developed Vitalink, a real-time health monitoring sensor utilizing an ESP32 to track SpO₂, heart rate, and temperature.
- Implemented an AI model to predict diastolic and systolic blood pressure, showcasing skills in machine learning and data analysis.
- Engineered a solution to address preventable ER visits, demonstrating a clear understanding of problem-solving and healthcare technology.
- Successfully navigated and resolved complex GitHub conflicts in a team environment, ensuring a smooth and timely project delivery.

Frontend Development Intern

SideHustle

04/2023

- Assisted in the development and maintenance of user-facing features, contributing to the creation of responsive and intuitive web applications.
- Gained hands-on experience with core frontend technologies, including HTML, CSS, and JavaScript.
- Collaborated with a development team to debug and optimize code, improving application performance and user experience.
- Participated in the full software development lifecycle, from initial design to final deployment.

Accelerated Soft Skills Training

Jobberman

03/2023

- Completed a comprehensive training program focused on essential professional soft skills.
- Developed expertise in effective communication and interpersonal skills critical for collaborative environments.
- Enhanced problem-solving abilities and time management skills to improve efficiency and project delivery.
- Gained a deeper understanding of workplace professionalism and teamwork dynamics.

PROJECTS

Estantien - Luxury Real Estate Platform

Personal Project | [View Project](#)

- Developed a sophisticated web platform for luxury real estate, featuring advanced search functionalities and a seamless, personalized browsing experience.
- Implemented a visually rich and responsive user interface, providing clients with an exclusive gateway to premium properties.
- Integrated features for virtual tours and curated property listings to enhance user engagement and property discovery.
- Gained experience in full-stack development by creating a platform that connects discerning clients with their ideal properties.

Kicks - Online Sneaker & Footwear Store

Personal Project | [View Project](#)

- Designed and developed a comprehensive e-commerce platform for trendy and comfortable footwear.
- Created a seamless online shopping experience with features for browsing, selecting, and purchasing products.
- Implemented a user-friendly interface to showcase a diverse collection of sneakers, boots, and athletic shoes.
- Gained hands-on experience in building a scalable e-commerce solution from concept to completion.

RentChain - Decentralized Renting & Property Management Platform

Hackathon Project | Collaborated with [@emmyhack](#) [View Project on GitHub](#)

- Developed an innovative, blockchain-based web platform for residential and commercial rent payments, built on the Morph network.
- Created a secure, transparent, and efficient solution for global landlords and tenants using decentralized technology.
- Leveraged blockchain to streamline transactions and interactions in property management.
- Gained hands-on experience in collaborative development and building on a decentralized network during a Dorahacks hackathon.

The Odin Project (Conceptual)

Personal Project | [View project](#)

- Designed and built a conceptual web page based on The Odin Project's open-source curriculum.
- Communicated the platform's mission to empower aspiring web developers and provide comprehensive learning paths.
- Focused on creating a welcoming and informative user experience for new learners.
- Gained experience in front-end development by cloning a well-established educational platform's style and function.
