

JOSHUA ONYEKA

Software Engineer | Full-Stack & AI Systems | Lagos, Nigeria
joshuaonyeka2020@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Innovative **Software Engineer** with a robust foundation in architecting high-performance, scalable digital solutions. Expert in **TypeScript, React.js**, and **Next.js**, with a specialized focus on integrating **AI-driven insights** and real-time data monitoring into complex ecosystems. Distinguished **4x Hackathon Winner** recognized for engineering award-winning healthcare technology and decentralized platforms.

CORE SKILLS

- **Engineering & Frameworks:** TypeScript, JavaScript (ES6+), React.js, Next.js, Flutter, Dart.
 - **Systems & Logic:** AI Quality & Testing, Google Gemini AI integration, RESTful APIs, State Management (Redux, React Query).
 - **Web3 & Backend:** Web3.js, Blockchain (Morph Network), Firebase.
 - **UI/UX & Performance:** Tailwind CSS, shadcn/ui, Framer Motion, Web Performance Tuning, SEO Optimization.
 - **Security & Tools:** Cybersecurity Principles, Git/GitHub, Vercel, Figma, Agile Methodologies.
-

PROFESSIONAL EXPERIENCE

Software Engineering Lead (Vitalink Project) | Cavista Technologies

February 2025

- **Architected** an award-winning healthcare AI platform utilizing ESP32 hardware sensors for real-time tracking of SpO2 and heart rate.
- **Developed** a predictive AI model to analyze blood pressure trends, demonstrating expertise in machine learning integration and data analysis.
- **Orchestrated** team version control and resolved complex Git conflicts to ensure high-velocity delivery within a hackathon environment.

Frontend Development Intern | SideHustle

April 2023 – June 2023

- **Engineered** responsive user-facing features and modular components using TypeScript and modern frameworks.
 - **Collaborated** on full-lifecycle testing and debugging, resulting in optimized application performance and stability.
 - **Managed** the deployment pipeline on Vercel, bridging the gap between design prototypes and production-ready software.
-

FEATURED TECHNICAL PROJECTS

RentChain – Decentralized Property Platform

- **Built** the client-side logic for a Web3 DApp to handle secure, trustless rent payments via smart contracts on the Morph Network.
- **Ensured** seamless integration between the blockchain backend and the frontend user interface for transparent transaction tracking.

BoukarTech – Tech Solutions Platform

- **Developed** a scalable, multi-page corporate website with a reusable component library built on shadcn/ui.
 - **Optimized** for SEO and accessibility, achieving elite Lighthouse scores for performance and speed.
-

EDUCATION

- **Bachelor of Science in Computer Science** | Lagos State University of Science and Technology | *Expected 2027*
 - **National Diploma in Computer Science** | Lagos State Polytechnic | 2023
-

TECHNICAL CERTIFICATIONS

- **AI For All & Responsible AI** – Microsoft Learn & MTN Skills Academy (2026).
- **Introduction to Cybersecurity** – Cisco Networking Academy (2023).
- **Android Beginner Track** – Google Developer Student Clubs (SSA Summit 2023).
- **React.js Crash Course** – Udemy (2026).
- **Accelerated Soft Skills Training** – Jobberman (2023).
- **Frontend Development Certification** – SideHustle (2023)
